billygong@me.com

Software quality engineer and SDET with twenty-five years testing web, mobile, and API platforms. Built REST and end-to-end test automation (Selenium, Cucumber, Playwright, Pytest) and an org-wide JMeter performance practice that cut load-testing time 70%. At Slack, owned QA end to end for eight feature teams in the Platform QA organization. Now applies the same rigor to AI systems: an MCP server that grounds model claims against an indexed corpus to block hallucinated citations, plus tooling for citation cross-checking and confidence scoring. MFA in Creative Writing with distinction.

Skills

- Testing & QA
- REST and E2E automation, Selenium, Cucumber, Playwright, Cypress, Pytest/Jest, JMeter (load/performance), API testing, test plans
- CI/CD
- GitHub Actions, Circle CI, Docker, Git
- Languages
- Python, Ruby, TypeScript/JavaScript, Node.js
- APIs
- REST, OpenAPI/Swagger, JSON Schema, OAuth
- AI quality & agents
- Anthropic SDK (Claude), MCP servers, hallucination guards (pgvector), citation cross-checking, confidence scoring

Experience

2022–PRESENT

SAN FRANCISCO, CA

- AI Quality & Verification Tooling
- Independent
- Lit Verity: an MCP server that grounds model claims against an indexed corpus to block hallucinated citations: automated verification for LLM output. TypeScript, Neon, pgvector. Two open-source Claude Code plugins doing citation cross-checking and confidence scoring, flagging fabricated or low-confidence claims before they ship. Anthropic SDK. Colophon: book-search engine in daily use at Fabulosa Books, shipped as an MCP server and an Express app. TypeScript, Docker.

2022–PRESENT

SAN FRANCISCO, CA

- Technical Lead & Bookseller
- Fabulosa Books
- Architected a multi-agent operations platform on the Anthropic stack: an orchestrator coordinating availability, fairness, coverage, and communication agents, a distributed and non-deterministic system running in production. Documented it end to end as a public seven-part developer tutorial. Built the full-stack scheduling system behind it (Next.js, Postgres): one action publishes an Eventbrite listing, an email blast, and social posts.

2017–2020

SAN FRANCISCO, CA

- Technical Lead Manager / Staff Engineer, Platform QA
- Slack Technologies
- Owned QA end to end for eight feature teams (Block Kit, Workflows, platform APIs); directed four staff and senior engineers, promoted three. Wrote the API

references, SDK guides, and platform tutorials used across the platform, and built internal Web API tooling that outside developers adopted as official documentation examples.

2015–2017
SAN FRANCISCO, CA

Senior SDET

Appthority (acquired by Symantec)

Built a full-stack end-to-end testing platform (Cucumber, Rails, Selenium, Circle CI). Authored API specs, test plans, and architecture records that transferred intact through the acquisition.

2012–2015
SAN MATEO, CA

Senior Quality Assurance Engineer

GoPro

Built a Ruby REST API testing framework with OAuth and a custom gem for automated RSpec generation. Established the org-wide JMeter performance practice and cut load-testing time 70%.

1997–2012

Earlier Experience

Quality Engineering Manager, Kyte (2010–2012); Senior QA Engineer, Coincident TV (2008–2010); Flex Builder Software QE III, Adobe Systems (2006–2008); Senior QA Engineer, Keepmedia (2003–2006); SQA Engineering Lead, Pixel Translations (1997–2001).

Education

2021–2024

MFA, Creative Writing (Fiction), with distinction

San Francisco State University

Faculty Lecturer.

1995

BA, Philosophy and English

University of California, Santa Barbara

2023

Certificate in Professional Editing

UC Berkeley Extension

Publications & Activity

Short fiction published in Fourteen Hills.
